Performer registration in Sandbox

Stage 0

Performer registration in Sandbox

There are two instances in Toloka: production (the main space, where data is labeled) and sandbox (a testing environment). We are going to use both.

And there are two types of accounts for Toloka: a requester account and a performer account. Unfortunately, you can't use the same ID both for requester and performer accounts. However, you can use the same ID for different instances.

In this course, you will need to use both types of accounts in both instances. In order to not confuse ourselves, we suggest to create two IDs and use them as follows:

	Performer	Requester
Sandbox	id1	will not be necessary
Production	id1	id2

Now, let's create the first ID and the first account you will need – a Sandbox Performer account. The other ones will follow on next steps.

There are two options to create a performer account in Toloka sandbox:

- if you have a Yandex account, you can use it for registration
- if you don't have a Yandex account, you need to create it from scratch or using social networks

You have a Yandex account

Toloka: Earn money by completing simple tasks

1. Go to **Toloka sandbox** and press Start earning money

Earn money by completing simple tasks online

Tokkia gives you the opportunity to make money online by performing simple tasks that computers cannot do like analyzing and racing various web content. For example, you check that a site matches a search overy, compare images or help categorize products. It's easy with Tobia — just pick a task, compiler it, and get

恭 Toloka

2. Choose your Yandex account from the list

Completing registration

Please provide real information about yourself that you can confirm with documents if necessary.
